

Next-Generation Pneumatic Unit

No piping
necessary

No complicated
work

Flexible
combinations

A wide range of parts and custom specifications are available to combine and to suit your worksite's needs.

Pilot operated 2-port solenoid valve
[For blow valve, etc.]

Direct acting 2-port solenoid valve
[For blow valve, etc.]

Residual pressure exhaust 3-port solenoid valve
[Suitable for modular component master valves]

Pilot-kick 2-port solenoid valve
[For main ON/OFF valve, etc.]

Pilot operated 5-port valve
[Actuator drive]

Module check valve
[Back-flow prevention]

4-way distributor
[For branching a line]

Masking adaptor
[For masking a connection]

Module conversion adaptor
[For adopting another series]
1000 Series and 3000 Series
4000 Series and 8000 Series
can be connected

Turn adaptor
[90 degrees rotatable]

CUSTOM AIR UNIT

VALVE UNIT

PART

Air Unit

CXU Series

The CXU Series combines various air components from valves to filter regulators, essential to pneumatic control and actuator drives. The number of processes for design and piping has been dramatically reduced.

No piping necessary • **No complicated work**

Save space from reduced piping

By just ordering the unit, there are no tedious and time consuming installation of components, no need to follow complicated piping designs and making errors. Everything comes preinstalled. Without most of the piping, the device not only looks well-organized, but also saves space.

High quality

No screw-in parts and no external leakage.
Foreign particles are blocked from entering the system during assembly.

Flexible combination

No restrictions on vertical/horizontal direction

Vertical and horizontal layout can be changed as required. Solenoid valves can be directly connected and layout is easy with less piping design work.
(AIR UNIT is a custom order product.)

Flexible exchanges and expansion

Modular connection enables flexible exchange and expansion of pneumatic components. The units can be attached/detached from the front of the equipment. Maintenance is very easy.

Major applications

• Machine tools

• Mounting and conveying
